Art Unit: 1661

Detailed Action

Objection to the Disclosure

37 CFR 1.163

The following is a quotation of section (a) of 37 CFR 1.163:

(a) The specification must contain as full and complete a disclosure as possible of the plant and the characteristics thereof that distinguish the same over related known varieties, and its antecedents, and must particularly point out where and in what manner the variety of plant has been asexually reproduced. In the case of a newly found plant, the specification must particularly point out the location and character of the area where the plant was discovered.

35 USC 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and fait distinctly claiming the subject matter which the applicant regards as his invention.

As specific to United States Plant Patent applications, the specifics of 37 CFR 1-164-2016-2016 (reproduced below) are controlling:

The claim shall be in formal terms to the new and distinct variety of the specified plant as described and illustrated, and may also recite the principal distinguishing characteristics. More than one claim is not permitted.

a compared to invention and or the manifered

Art Unit: 1661

Detailed Action

In plant applications filed under 35 U.S.C 161, the requirements of 35 U.S.C. 112 are limited. The following is a quotation of 35 U.S.C. 162:

No plant patent shall be declared invalid for noncompliance with section 112 of this title if the description is as complete as is reasonably possible. The claim in the specification shall be in formal terms to the plant shown and described.

The disclosure is objected to under 35 CFR 1.163(a) and under 35 U.S.C. 112, first paragraph, because the specification presents less than a full, clear, and complete botanical description of the plant and the characteristics which define same per se and which distinguish the plant from related known cultivars and antecedents.

More Specifically:

A. Applicant should set forth all cultivar names in the title and throughout the entire as specification in single quotation marks unless preceded by the term "cultivar" as this is the proper way to set forth a cultivar designation (International Code of Nomenclature for Cultivated Plants, article 29).

B. The disclosure is objected to under 37 CFR 1.121 (e) because the Latin name of the meaning of the distinguish agenus and species of the claimed plant and Variety Denomination of the claimed plant should be

v and throughout the cutine

Art Unit: 1661

Detailed Action

preceded by a heading as set forth in 37 CFR 1.163(c)(4)(5) and 37 CFR 1.163(d). This information should be set forth before line 8 of the specification as set forth in 37 CFR 1.163(c).

- C. Page 3, lines 5 and 6, Applicant sets forth two parental cultivars. However, applicant has net stated which was the female parent and which was the male parent. Applicant should set forth in the specification which was the female parent and which was the male parent.

 Correction and/or clarification is necessary.
- "seed" of the new variety produced by this cross pollination. It is not understood how the instant plant could have been asexually reproduced from a seed. It appears the cross pollination produced many plants from which applicant chose a particular plant, as a single plant among plants from the cross pollination, named it '90-3437', then asexually reproduced the plant.

 Correction and/or clarification is necessary. Further, applicant should set forth in the specification how the instant plant was asexually reproduced such as a cutting, grafting, or something else which would be appropriate for this type of plant.

Serial Number: 09/935,491 Page 6

Art Unit: 1661

Detailed Action

J. Page 6, line 20 and page 7, line 1, Applicant states "reddish". Applicant should set forth in the specification a color designation for the "reddish" coloration. The recitation "reddish" is vague and insufficient in this regard.

K. Page 7, line 13, Applicant states "reddish-purple". Applicant should set forth in the specification a color designation for the "reddish-purple" coloration. The recitation "reddish-purple" is vague and insufficient in this regard.

L. Page 7, lines 2-15, Applicant should set forth in the specification additional information relative to the instant plant's leaves including the typical and observed leaf apex and base shape.

M. Page 9, line 1, Applicant should set forth in the specification additional information relative to the instant plant's peduncle including the typical and observed diameter and coloration with reference to the color chart employed.

..... in the in-ullicionem inisaugu de

N. Page 9, line 14, Applicant sets forth a coloration for the "Petiole". However, applicant should verify whether petiole is intended or pedicel. If applicant intended to state

Art Unit: 1661

Detailed Action

pedicel then the typical and observed pedicel length and diameter should be set forth in the specification.

- O. Page 11, line 19, Applicant states pedicel color is "Greenish-brown (14-K-3 Serpentine Green)". However, applicant previously sets forth a coloration for what applicant may have intended to be the pedicel on page 9, line 14 as Medium green (19-K-6 Sea Foam). If both recitations are for the instant plant's pedicel, it appears they should be the same coloration. Correction and/or clarification is necessary.
- P. Page 12, lines 16-20, Applicant should set forth in the specification additional information relative the instant plant's berry including the typical and observed berry brix.
- Q. Page 14, The Claim, line 1, Applicant should insert --plant-- after "grapevine" as The Claim needs to be directed to "the plant" (MPEP 1605, 37 CFR 1.164). Alternatively, Applicant could delete the instant claim and insert the following --A new and distinct cultivar-of Grapevine plant named '90-3437', as illustrated and described.--.

5-20. Applied to the leaves of the appelification additional

Art Unit: 1661

Detailed Action

R. Page 14, The Claim, line 4 and page 15, Abstract, line 4, Applicant states "superior" flavor". Applicant should delete this recitation as it appears to be a laudatory expression (MPEP 1610). Correction is necessary.

The above listing may not be complete. Applicant should carefully review the disclosure and import into same any corrected or additional information which would aid in botanically identifying and/or distinguishing the cultivar for which United States Plant Patent protection is sought.

Claim Rejection

the Chandline Jan spage S. strategi, New 4, Applicant states I superior.

35 U.S.C. 112, 1st & 2nd Paragraphs

Claim 1 is rejected under 35 U.S.C. 112, first and second paragraphs as not being supported by a clear and complete botanical description of the plant for the reasons set forth in the Objection to the Disclosure Section above.

condinutagrable as not heime.
